We hereby inform that the Rules for the Classification and Construction of Sea-Going Ships shall be amended as specified in the Appendices to the Circular Letter.

It is necessary to do the following:

1. Bring the content of the Circular Letter to the notice of the RS surveyors, interested organizations and persons in the area of the RS Branch Offices’ activity.

2. Amendments introduced by the Circular Letter shall be applied during review and approval of the technical documentation on cargo ships covered by the provisions of SOLAS 74/78 subject to any conversion which affects the level of subdivision of the ship contracted for construction before 01.02.1992 regardless of the length and before 01.07.1998 for ships less than 100 m in length.

List of the amended and/or introduced paras/chapters/sections:

Part V: para 1.1.5

RULES FOR THE CLASSIFICATION AND CONSTRUCTION
OF SEA-GOING SHIPS, 2020

ND No. 2-020101-124-E

PART V. SUBDIVISION

1 GENERAL

New para 1.1.5 is introduced reading as follows:

"1.1.5 Where an existing cargo ship covered by the provisions of SOLAS 74/78 is subject to any conversion, which affects the level of subdivision of that ship, it shall be demonstrated that the A/R ratio calculated for the ship after such conversion is not less than the A/R ratio calculated for the ship before the conversion. However, in those cases where the ship’s A/R ratio before conversion is equal to or greater than unity, it is only necessary to demonstrate that the ship after such conversion has an A value, which is not less than R, calculated for the ship after conversion.

A definition of the term "existing cargo ship" in the context of the above interpretation means a cargo ship constructed before 1 February 1992, regardless of the length and a ship constructed before 1 July 1998 of 100 m in length or less.".
