FOR THE CLASSIFICATION, CONSTRUCTION AND EQUIPMENT OF MOBILE OFFSHORE DRILLING UNITS AND FIXED OFFSHORE PLATFORMS

PART IX

BOILERS, HEAT EXCHANGERS AND PRESSURE VESSELS

ND No. 2-020201-019-E

**St. Petersburg
2022**

RULES FOR THE CLASSIFICATION, CONSTRUCTION AND EQUIPMENT OF MOBILE OFFSHORE DRILLING UNITS AND FIXED OFFSHORE PLATFORMS

Rules for the Classification, Construction and Equipment of Mobile Offshore Drilling Units (MODU) and Fixed Offshore Platforms of (FOP) of Russian Maritime Register of Shipping (RS, the Register) have been approved in accordance with the established approval procedure and come into force on 1 July 2022.

The present edition of the Rules is based on the 2018 edition taking into account the amendments and additions developed before publication.

The Rules set down specific requirements for MODU and FOP, consider the recommendations of the Code for the Construction and Equipment of Mobile Offshore Drilling Units (MODU Code), as adopted by the IMO Assembly on 2 December 2009 (IMO resolution A.1023(26)).

The procedural requirements, unified requirements, unified interpretations and recommendations of the International Association of Classification Societies (IACS) and the relevant resolutions of the International Maritime Organization (IMO) have been taken into consideration.

The Rules are published in the following parts:

Part I "Classification";

Part II "Hull";

Part III "Equipment, Arrangements and Outfit of MODU/FOP";

Part IV "Stability";

Part V "Subdivision";

Part VI "Fire Protection";

Part VII "Machinery Installations and Machinery";

Part VIII "Systems and Piping";

Part IX "Boilers, Heat Exchangers and Pressure Vessels";

Part X "Electrical Equipment";

Part XI "Refrigerating Plants";

Part XII "Materials";

Part XIII "Welding";

Part XIV "Automation";

Part XV "MODU and FOP Safety Assessment";

Part XVI "Signal Means";

Part XVII "Life-Saving Appliances";

Part XVIII "Radio Equipment";

Part XIX "Navigational Equipment";

Part XX "Equipment for Prevention of Pollution".

These Rules supplement the Rules for the Classification and Construction of Sea-Going Ships and the Rules for the Equipment of Sea-Going Ships.

REVISION HISTORY

(purely editorial amendments are not included in the Revision History)

For this version, there are no amendments to be included in the Revision History.

1 APPLICATION

1.1 The requirements of this Part of the Rules for the Classification, Construction and Equipment of Mobile Offshore Drilling Units (MODU) and Fixed Offshore Platforms (FOP)¹ apply to boilers, heat exchangers and pressure vessels used to ensure operation of the systems and machinery serving the power plant and accommodation sector of the MODU or FOP.

1.2 Boilers, heat exchangers and pressure vessels intended for other purpose may comply with the requirements of the MODU/FOP Rules in so much as practicable and reasonable.

¹ Hereinafter referred to as "the MODU/FOP Rules".

2 GENERAL

2.1 The scope of technical supervision, materials used, strength of structural elements, welding and heat treatment, as well as the amount of testing of boilers, heat exchangers and pressure vessels mentioned in [1.1](#) shall comply with the requirements of Sections 1 and 2, Part X "Boilers, Heat Exchangers and Pressure Vessels" of the Rules for the Classification and Construction of Sea-Going Ships¹.

¹ Hereinafter referred to as "the Rules for the Classification".

3 BOILERS

3.1 Steam boilers, as well as thermal oil boilers used on MODU and FOP, their burning installations, control, regulation, protection and alarm systems, fittings and gauges shall comply with the requirements of Sections 3 – 5, Part X "Boilers, Heat Exchangers and Pressure Vessels" of the Rules for the Classification.

4 HEAT EXCHANGERS AND PRESSURE VESSELS

4.1 Heat exchangers and pressure vessels shall comply with the requirements of Section 6, Part X "Boilers, Heat Exchangers and Pressure Vessels" of the Rules for the Classification.

4.1.1 Hydraulic accumulators.

4.1.1.1 The gas and liquid phases of the hydraulic accumulators shall be suitably separated in case where their direct contact can result in loss of the gas or spoilage of the liquid phase.

4.1.1.2 Each hydraulic accumulator shall be provided with a safety device fitted on the gas side. Such device may be fitted on the non-disconnectable portion of the pipeline.

4.1.1.3 Gas cylinders intended for filling of the hydraulic accumulators shall be manufactured to the standards approved by the Register.
